

The intelliVessel™

Introducing the next generation in
“Smart Tank” technology.

Are your current process vessels OLD SCHOOL? If so, you’re definitely not alone. There has been a need for an intelligent SMART TANK in the industry for some time and there has never been a solution...

Until now. The next generation in Smart Tank technology has arrived in the development of the “intelliVessel™”. You can now control your vessel’s operation with virtually limitless parameters from the vessel’s integrated touch screen PLC or even your smart phone or tablet all from the vessel or your home office. It’s that easy.
